

## BUILDING SPECIFICATIONS

<b>LOCATION:</b>	Located right off of Exit 8 of I-95, and minutes away from Stamford Metro Center.	<b>HEATING/COOLING:</b>	The building is heated and cooled by an energy efficient water source heat pump system. The newly installed in 2013 closed loop systems includes heating water pumps, condenser water pumps, cooling tower pumps, heat exchanger, boilers and cooling tower. Ventilation is provided by roof mounted energy recovery units. Individually controlled ceiling - mounted heat pumps provide simultaneous heating and cooling for each zone. The system provides proper back bone for tenant's flexible zoning and distribution. Heating and cooling to be distributed through plenum alleviating the need for perimeter radiators.
